

ASSIGNMENT 2C

Code :

The image shows a VS Code editor with the file explorer on the left and the login.component.html file open in the editor. The file explorer shows the project structure for 'user-registration-app', including folders like .angular, .vscode, node_modules, public, src, and app. The app folder contains components, login, profile, register, models, and services. The login component is selected, showing its files: login.component.html, login.component.ts, and login.component.spec.ts. The editor shows the HTML code for login.component.html, which includes a form with a password input, an error message display, and a login button. The code is as follows:

```
1 <div >...</div>
3 <form [formGroup]="loginForm" (ngSubmit)="onSubmit()">
9 <div >...</div>
11 <input type="password" id="password" formControlName="password" >...</input>
12 </div>
13
14 <div *ngIf="errorMessage">
15   {{ errorMessage }}
16 </div>
17
18 <button type="submit" [disabled]="!loginForm.valid">Login</button>
19 <p>Don't have an account? <a routerLink="/register">Register</a></p>
20 </form>
21 </div>
```

OUTPUT:
